KEEP YOUR SMALL POOLS CLEAN & SAFE

Kiddie and wading pools are sold primarily as toys, and millions of them are owned today. But as time goes by, dirty toys can breed terrible illnesses and become potentially hazardous. Garden hose wands create partial vacuums and cannot remove harmful particles such as sand.

CDC WARNING

The Center for Disease Control, along with hundreds of State and Local Health & Safety Departments have issued dire warnings about the consequences of failing to keep wading and kiddie pools clean and free of debris. Failure to do so can cause West Nile Virus and other recreational water illnesses.
